About this document

Each screen is paired with its description, primary user goal, key UI components, and design note. All eight images are the supplied Savoria screenshots; no placeholder images are included.

SCREEN 01

Welcome Back Login Screen

Sign-in screen for returning users.

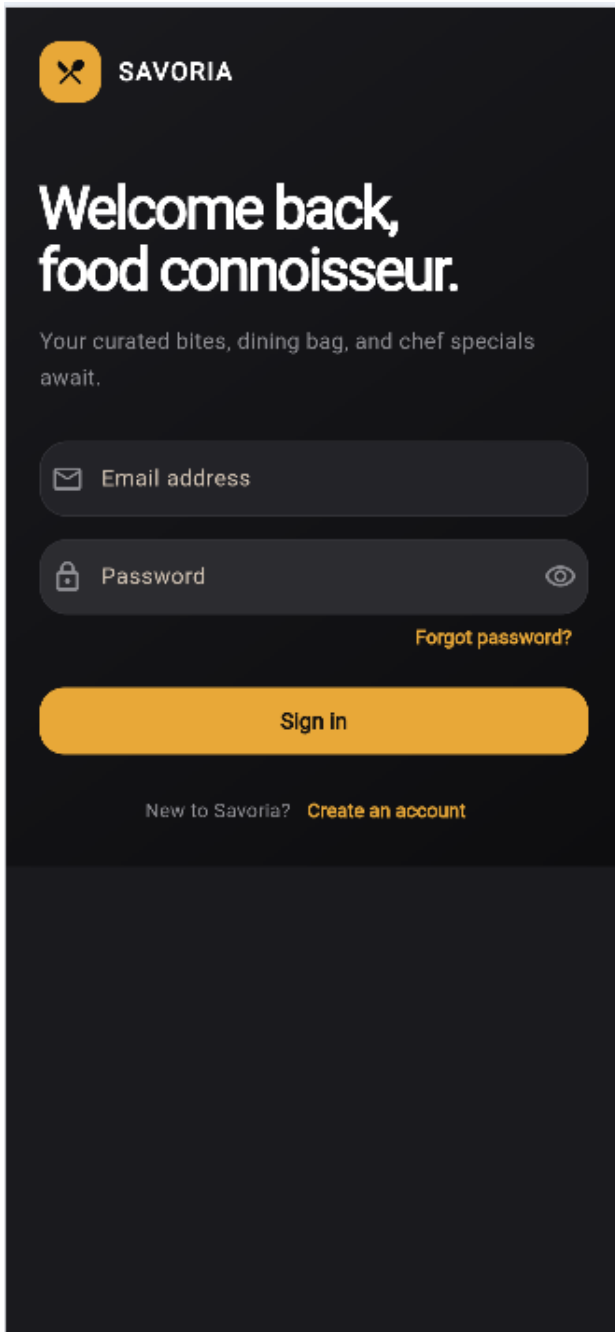

Figure 1: Welcome Back Login Screen

Description

This screen welcomes returning users and gives them a clear path to sign in with email and password. It includes a password recovery link and an option to create a new account.

Primary user goal

Help users access their account quickly while keeping the interface elegant and trustworthy.

Key UI components

- App logo and welcome headline
- Email and password input fields
- Forgot password link
- Sign-in button
- Account creation prompt for new users

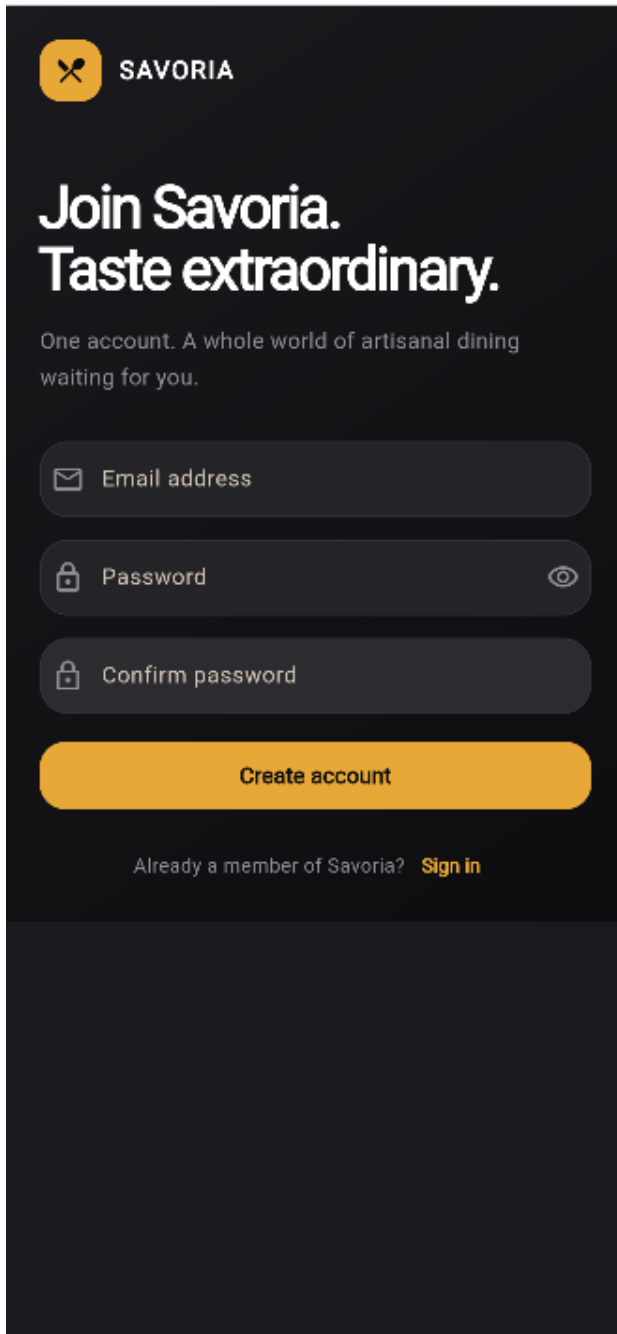

Design note

The dark background, muted input fields, and bold golden-yellow login button create a premium, artisanal dining onboarding experience.

SCREEN 02

Join Savoria Screen

Account registration for new users.

A mobile app screen for joining Savoria. The background is dark. At the top left is the SAVORIA logo, which consists of a yellow circle with a black fork and knife icon, followed by the word "SAVORIA" in white. Below the logo is the headline "Join Savoria. Taste extraordinary." in large, bold, white font. Underneath the headline is a sub-headline "One account. A whole world of artisanal dining waiting for you." in a smaller white font. The registration form consists of three input fields: "Email address" with an envelope icon, "Password" with a lock icon and a toggle eye icon, and "Confirm password" with a lock icon. Below these fields is a large yellow button with the text "Create account" in black. At the bottom, there is a link that says "Already a member of Savoria? Sign in" where "Sign in" is in yellow.

Description

This screen invites new users to join the platform, offering a seamless registration process with email, password, and confirmation fields.

Primary user goal

Allow users to easily create a new account and enter the ecosystem.

Key UI components

- Compelling welcome headline
- Email, password, and confirm password fields
- Create account button
- Sign-in link for existing users

Design note

The typography is bold and modern, emphasizing the 'extraordinary' taste experience awaiting the user.

Figure 2: Join Savoria Screen

SCREEN 03

Home and Menu Browsing Screen

Main discovery screen for food browsing and quick ordering.

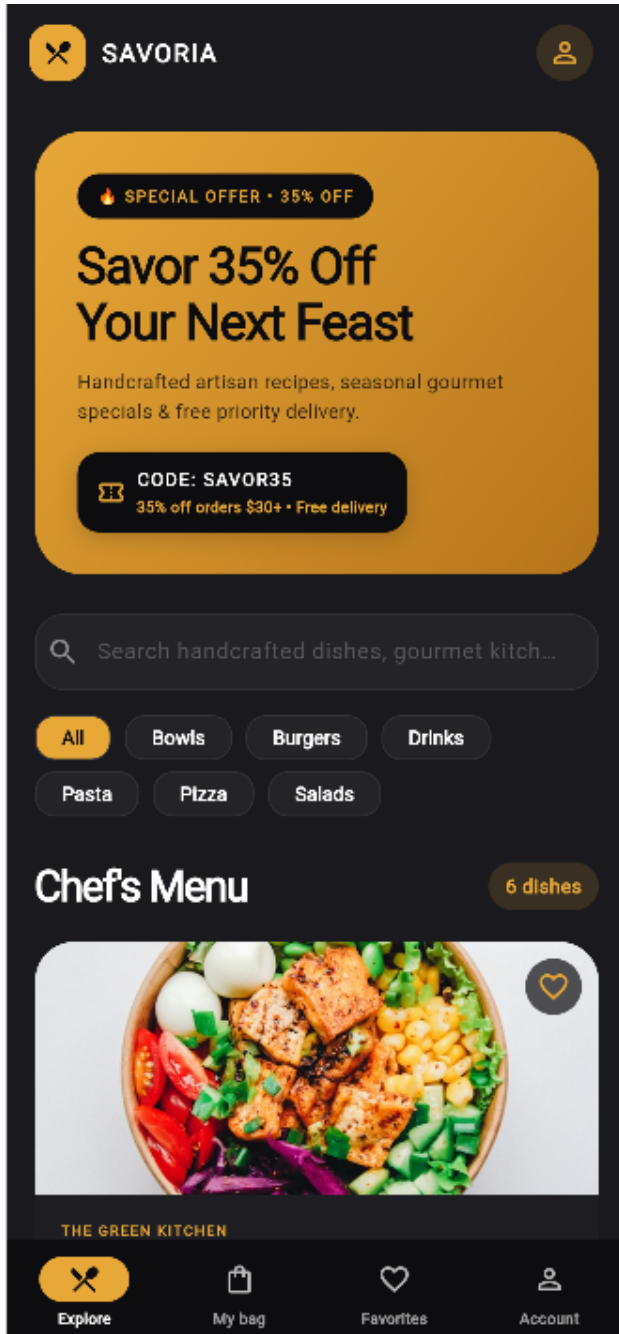

Figure 3: Home and Menu Browsing Screen

Description

This screen displays promotional offers, a search bar, category filters, and the Chef's Menu. It is designed to help users discover meals quickly and move toward ordering with minimal friction.

Primary user goal

Let users search, filter, compare, and select food items from one central home screen.

Key UI components

- Promotional discount banner with promo code
- Search input area
- Food category chips (All, Bowls, Burgers, etc.)
- Chef's Menu item cards
- Bottom navigation bar

Design note

The layout balances promotion and navigation. The bold yellow promotional card instantly catches the eye against the dark background.

SCREEN 04

Chef's Menu Screen

Detailed list of available culinary creations.

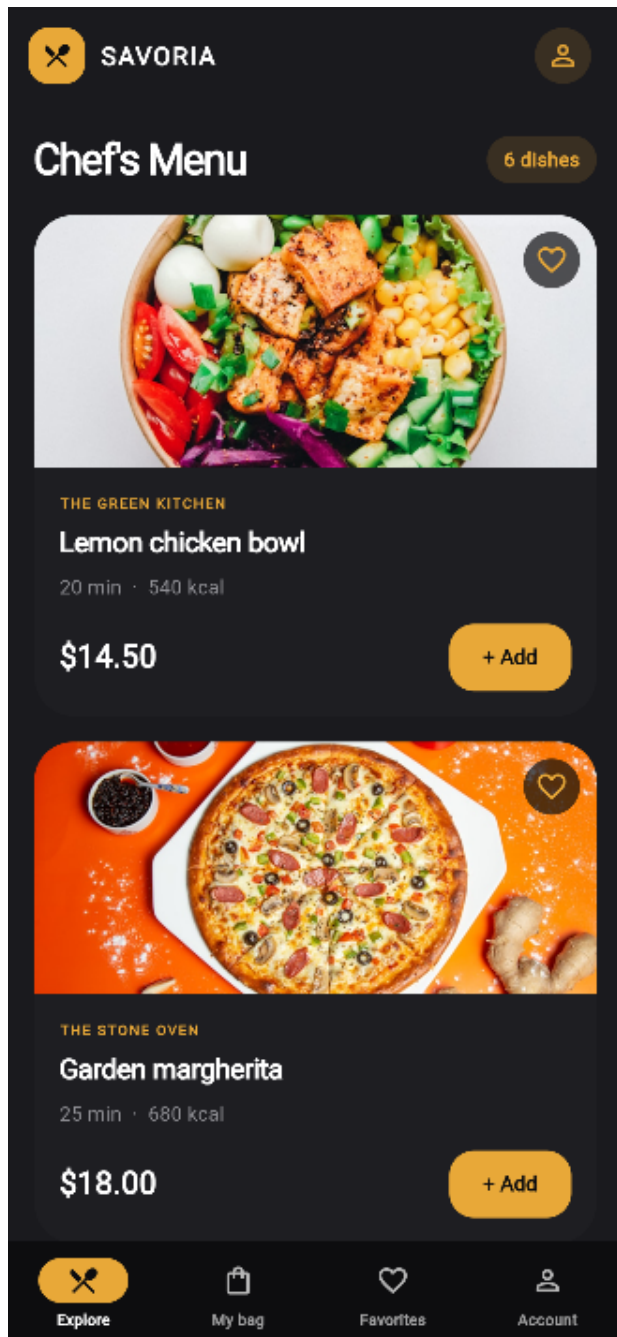

Figure 4: Chef's Menu Screen

Description

This screen lists multiple menu items such as the Lemon chicken bowl and Garden margherita, complete with high-quality imagery, preparation time, calories, and price.

Primary user goal

Browse through the chef's offerings and add desired items to the bag.

Key UI components

- Large hero images for each dish
- Dish title and restaurant/category subtitle
- Preparation time and calorie metadata
- Add button
- Favorite icon

Design note

The visual hierarchy is strong: the vibrant food images stand out vividly on the dark canvas, while price and add actions stay clearly visible.

SCREEN 05

Curated Favorites Screen

Saved dishes for faster repeat ordering.

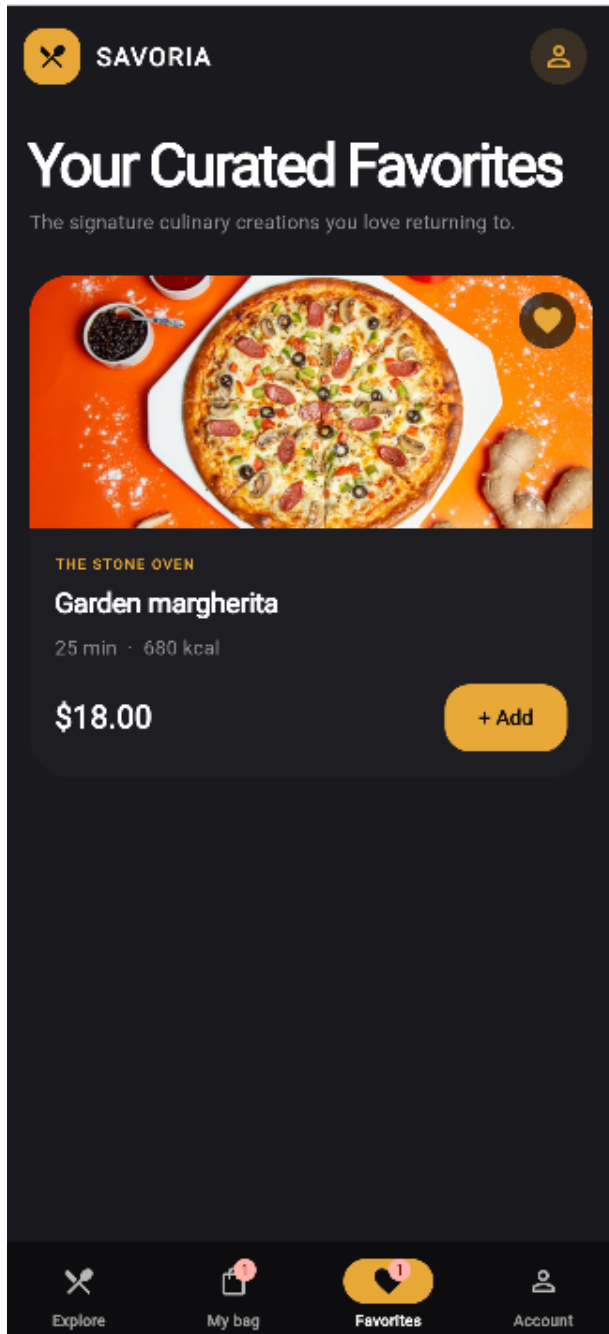

Figure 5: Curated Favorites Screen

Description

This screen stores the user's saved or favorite dishes in a focused format. Each card shows the item image, name, prep time, calories, and an add-to-bag action.

Primary user goal

Help users quickly return to meals they already like without searching again.

Key UI components

- Header with descriptive subtext
- Favorite item cards
- Food thumbnail/hero images
- Metadata and pricing
- Add button

Design note

The prominent golden heart icon clearly communicates the item's favorite status.

SCREEN 06

Your Dining Bag Screen

Order review and checkout preparation.

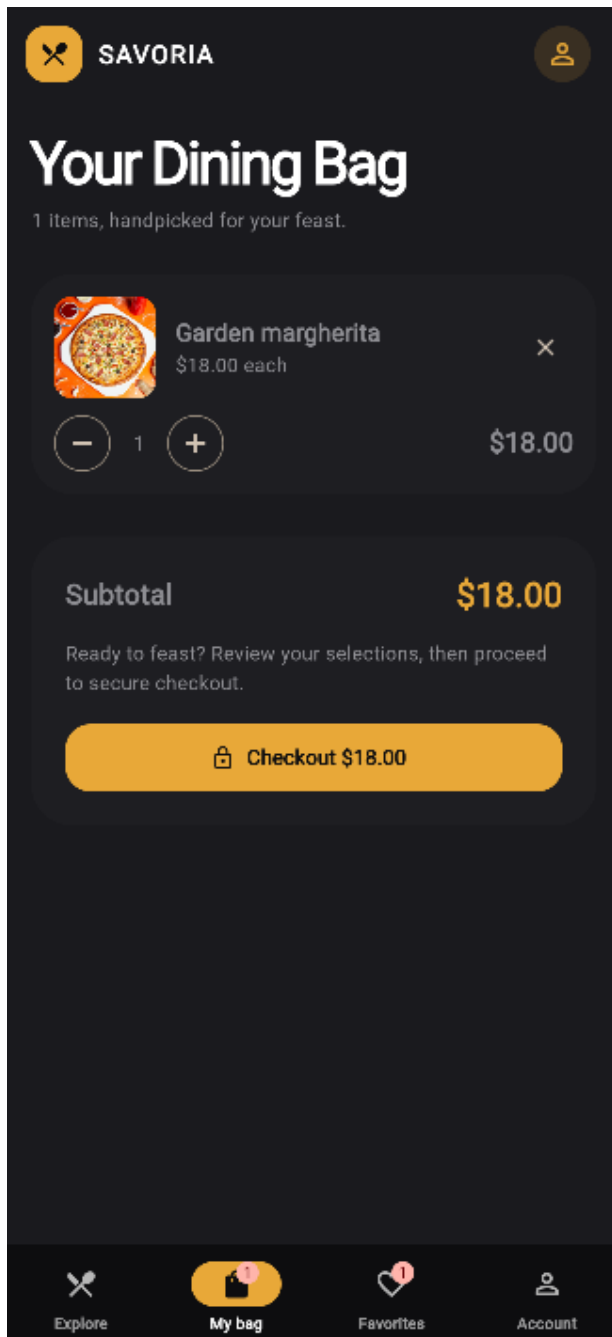

Figure 6: Your Dining Bag Screen

Description

This cart screen shows the selected items, item price, quantity controls, subtotal, and the checkout call-to-action. It gives the user a clear financial summary before placing the order.

Primary user goal

Allow users to review their order, adjust quantity, confirm cost, and proceed to checkout.

Key UI components

- Cart item card with thumbnail
- Quantity selector (+/-)
- Delete/remove icon (x)
- Subtotal
- Checkout button with total amount

Design note

The summary panel below the item card improves clarity. The golden checkout button stands out as the primary next action.

SCREEN 07

Order Confirmation Modal

Successful order placement feedback state.

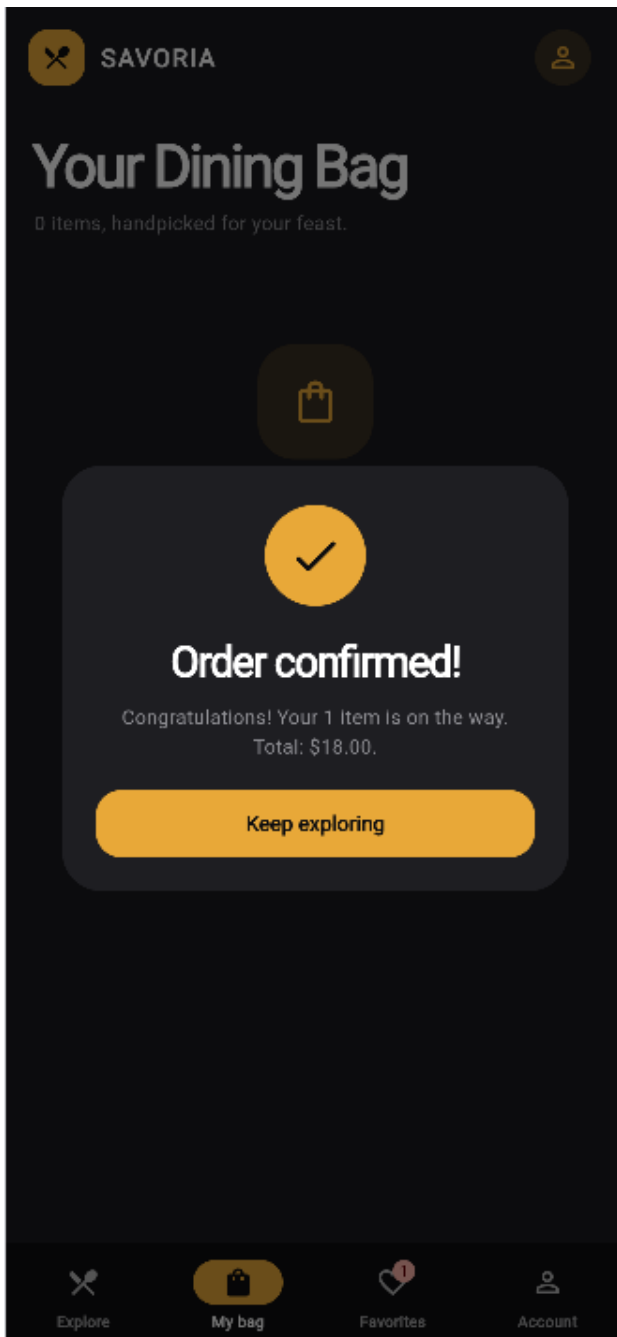

Figure 7: Order Confirmation Modal

Description

After checkout, this modal confirms that the order has been placed. The background is dimmed to focus attention on the success message, check icon, and acknowledgement button.

Primary user goal

Reassure users that the transaction is complete and the meal is on the way.

Key UI components

- Dimmed cart background
- Centered success modal
- Golden check mark icon
- Success message and total
- Keep exploring button

Design note

The modal uses a simple success pattern that is easy to understand instantly. The high contrast layout reduces uncertainty after checkout.

SCREEN 08

Dining Profile Screen

User account management and settings hub.

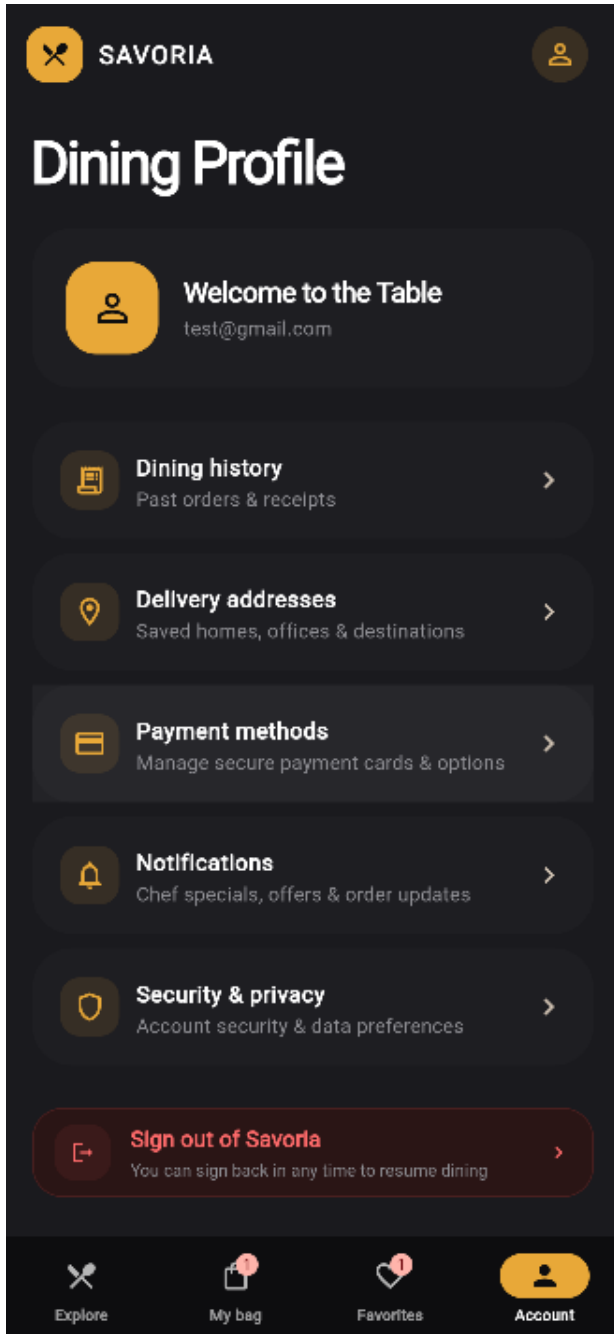

Figure 8: Dining Profile Screen

Description

This profile screen gives users access to account information and key settings. It includes user identity, dining history, delivery addresses, payment methods, notifications, and security options.

Primary user goal

Provide a central place for users to manage account, delivery, payment, notification, and privacy settings.

Key UI components

- Profile identity card with email
- Dining history shortcut
- Address and payment management
- Notification and security settings
- Sign out button highlighted in red

Design note

The screen uses strong spacing, rounded settings rows, and subtle icons so account actions are easy to locate and understand.
